Krestmark® Collection

ALUMINUM

100
SERIES

100 SERIES

The 100 and Aluminum windows are mainly a new construction window with standard sizes. However, either can be ordered exact size with or without nail-fin for additional charge. The 100 single hung has a spiral balance and is non tilt. Call out is actual size, ie. 2030 measures 24x36, suggested rough opening is ½" over window size.

FEATURES

- Aluminum is tremendously strong and stable. It will not swell, shrink, split or crack over the years. It is very durable and can't rust.
- All 4 frame corners and meeting rail connections are sealed with Polyseamseal to keep the weather out and reduce air infiltration.
- Sash members are interlocked for additional strength at corners and locking rail.
- Two positive sash locks reduce air infiltration (should remain locked when installing).
- Weatherstripping: Sash perimeter is weatherstripped with wool pile and/or soft vinyl for quiet, smooth operation and to resist weather penetration.
- 5/8" insulated glass with warm edge glass spacer. Type and look of warm edge spacer may vary.
- Sloped sill for easy water run off. Corners sealed with Polyseamseal.
- Quality certified in accordance with AAMA specifications.

Note: All picture windows, shapes and one-frame glass larger than 30 square feet will come with Tempered Glass as standard for safety reasons. All additional charges for Tempered Glass will automatically be applied.

OPTIONS

- Glazing: E66 is a light green tint with most efficient U & SHGC.
- Tempered, Obscure, Bronze or Grey glass. LoE E40 is a soft muted blue color to reduce solar glare and heat gain.
- Factory-mulled or stacked units and field mull accessories.
- Custom sizes available with or without fin.
